Subject: RE: EPA established risk level for Passaic sediments?

That information will be published with the FFS and Proposed Plan.

Subject: EPA established risk level for Passaic sediments?

Hi Alice: This may seem like an incredibly naive question, but I can't seem to find any documentation related to EPA's risk-based goal that has been established for 2-3-7-8 TCDD in the Passaic River sediments. So, to save me a bunch of additional futile searching effort, could you please provide me with that information?

Thanks! Mick
